

CONTENTS

<i>Preface</i>	<i>vii</i>
<i>Visual Walkthrough</i>	<i>xiii</i>
1. Compilers—An Introduction	1
Introduction	1
1.1 The Bigger Picture	2
1.2 The Compiler	5
1.3 Compiler Implementation	13
1.4 Data Structures in a Compiler	14
1.5 Study Plan	15
Summary	16
Review Questions and Exercises	16
2. Lexical Analysis	18
Introduction	18
2.1 Elements of Lexical Analysis	20
2.2 The Mechanics of Lexical Analyser Generators	32
2.3 rlex—A Restricted Lexical Analyser Generator	38
Summary	66
Review Questions and Exercises	66
3. Syntax Analysis	69
Introduction	69
3.1 Context-free Grammar	70
3.2 Classification of Parsing Techniques	82
3.3 Error Reporting and Recovery in Syntax Analyser	84
3.4 Top-down Parsing	86
3.5 Bottom-up Parsing	113
3.6 A Syntax Analyser for C Language	180
Summary	183
Review Questions and Exercises	183
4. Semantic Analysis	186
Introduction	186
4.1 Syntax-Directed Translation	190
4.2 Semantic Analysis	218
Summary	246
Review Questions and Exercises	247

5. Intermediate Code Generation	249
Introduction	249
5.1 Intermediate Forms	249
5.2 Intermediate Code Generation	261
<i>Summary</i>	319
<i>Review Questions and Exercises</i>	320
6. Target Code Generation	322
Introduction	322
6.1 Target Program	323
6.2 x86 Primer	323
6.3 Runtime Environment	345
6.4 Code Generation for x86	397
6.5 A Toy C Language Compiler 'MYCC'	405
<i>Summary</i>	411
<i>Review Questions and Exercises</i>	411
7. Code Optimisation	414
Introduction	414
7.1 Scope for Improvement	414
7.2 Intermediate Code Optimisation	417
7.3 Target Code Optimisation	552
<i>Summary</i>	574
<i>Review Questions and Exercises</i>	575
<i>Index</i>	579
